

**Know what's below.
Call before you dig.**

All in For Damage Free Digging' *Safe Digging is a Shared Responsibility*

As an employee in the damage prevention community and as an ambassador of safe digging, I pledge to lead by example by always calling 811 before I dig. I will do this for every digging project, every time. Furthermore I will encourage my coworkers, customers, neighbors and family members to do the same. I understand that calling Georgia 811 before I dig starts an important communication process that allows member utility companies mark the location of their buried facilities. This helps protect me, my family and my community, from injury, service outage, costly repairs or fines.

Contacting Georgia 811 two business days before any digging project is a free call and the service of having member utility companies mark their underground lines is free. My one call to 811 allows Georgia 811 to notify those member utility companies who have service in my digging area to send out locate technicians who will mark the approximate location of the buried lines with colored paint and flags. I will wait the required amount of time so that allow member utility companies are able to respond to my locate request. Once the lines are marked, I will respect those marks and dig with care. I understand that knowing what is below will protect me and those around me.

I understand that my job duties include being a stakeholder in the underground utility damage prevention process. Furthermore, I acknowledge that it is the law to call before digging in Georgia.

I pledge to:

Call 811 at least 2 business days before digging

Wait the required amount of time

Respect the Marks

Dig With Care

I will share this important safety message with others.

I'm all in for Damage Free Diggin'!
