

## **Official Utilities Protection Center, Inc. Business Notification** **PRIS Code Changes: 3F, 3G, 3Z**

Duluth, GA – July 31<sup>st</sup>, 2008 – Please be advised that on August 1<sup>st</sup>, 2008 PRIS response codes 3F and 3G will no longer be available for use.

Additionally a new PRIS code (3Z) will be added to the list of acceptable PRIS response codes. The new code reads as follows:

**3Z - Unmarked: On-going job, locate technician and contractor have established a written agreement on scheduled marking.**

This new code is designed to be used by members/locate technicians as a way to respond to locate requests where both the Utility Owner/Operator and the Excavator have agreed in writing to a marking schedule. This code should only be used after a written agreement has been signed by both parties.

On August 1<sup>st</sup> this new code will be active and ready for use.
