Positive Response Information System

The Positive Response Information System (PRIS) is designed to assist communication between excavators and the utility facility operators. Once a locate request has been made by an excavator, the facility operator will receive a copy of the request and will respond within a specified time frame if they have facilities in the area. The facility operator will then report to the Positive Response Information System that their lines are either marked, marked with exceptions, or unmarked (including the reason). An excavator may then access this information by calling (866) 461-7271 or on the Internet at <http://eden.gaupc.com> or www.georgia811.com to clarify the status of the markings.

Members must respond to PRIS on Normal, Insufficient, Additional Request, Restake, and Design tickets. They are not required to respond on Emergency, Damage, and Overhead tickets.

Any person performing excavation is responsible for being aware of all information timely entered into the Positive Response Information System prior to the commencement of excavation.

Positive Response Codes

Marked
