

Map Tools

Map Tools

The map tools help you search, identify and mark the dig site.

Note: Web users are responsible for the accuracy of information entered on created locate tickets. Notified facility owners/operators are determined by the map data provided by the excavator.

Map/Search Results:

- Select *Use Ticket* to search for a location using the ticket information entered.
- The search results will list options for the *County Parcel*, *Intersection*, *Street Address In Range*, *Street Name*, *Similar Street Name*, *Google Results*, *Google Intersection*.

Note: Selecting *County Parcel* will bring up the exact address entered.

- Select the correct street or address where the work will be done using the available search results.

Map/Tools:

- Use the *Mark Point*, *Mark Line*, *Mark Area* or *Use Selection* tools to select the dig site:
 - Mark Point – Draws a point on the map with a 200 ft. buffer.
 - Mark Line – Draws a line on the map with a 200 ft. buffer.
 - Mark Area – Draws a shape on the map with a 200 ft. buffer.
 - Use Selection – Draws a 200 ft. buffer around the selection.

Note: You must double-click at the end point to release the tool and complete the drawing.

- Measure – Measures the area on the map. (The measure tool does not save the map).

Map Tools

- Pan – Moves the viewable map area.
- Clear – Clears the map.
- Zoom – Zoom in and out of the map.
- Layers – Provides two map views: map and aerial view.
